AGUSTIN ALONSO

Software developer

TEL: 1150299350   **agustinalonsourtiaga78@gmail.com**

Ravensburg, Baden-Wurtemberg, Alemania

ABOUT ME

Experienced software engineer with a strong background in Next.js and Node.js, focused on building scalable full-stack applications. Skilled in server-side rendering, API integration, and delivering efficient, maintainable solutions. Driven by continuous learning and collaboration to create high-quality products.

Education

ORT Systems analyst

In progress, start: july 2022
Ends in: 2025

Courses

- SQL in Alumni.
- Database and sql in Alumni
- POO in Alumni

Languages

English B2 - Spanish Native

Skills

- React / Redux
- Java
- PostgreSQL
- Docker
- Linux / UNIX
- Git / GitHub
- Scrum / Agile Methodologies

Professional Experience

Software Engineer – Ignitix
(October 2023 – Present)

- Building full-stack applications with a focus on Java (Spring Boot) and React.
- Leveraging TypeScript to ensure type safety and maintainable frontend code.
- Optimizing queries and improving performance in SQL databases.
- Integrating and implementing RESTful APIs and third-party API services.
- Applying asynchronous programming techniques to enhance performance.
- Working in UNIX environments, automating processes, and managing deployments with Docker and Jenkins CI.
- Familiar with AWS Cloud Platform for cloud services.
- Collaborating through Git, GitHub, GitLab, and Slack to ensure smooth workflows.
- Ensuring high standards of testing, debugging, and code quality to deliver user-friendly experiences.
- Active participation in remote teams, taking ownership of tasks and challenges.

Software Engineer – SMS Sudamérica
(January 2022 – September 2023)

- Developed web applications using React and Java to build scalable solutions.
- Worked with Docker to manage containers and microservices efficiently.
- Followed Agile practices, working closely with the team in Scrum.
- Used Git for version control to collaborate effectively on projects.
- Focused on building maintainable solutions, emphasizing code quality and best practices.
